Options

☐ Show Source ☐ Show Outline ☒ List Messages Sequentially ☐ Group Error Messages by Type
☐ Validate error pages ☐ Verbose Output ☐ Clean up Markup with HTML-Tidy

[Help](#) on the options is available.

Notes and Potential Issues

The following notes and warnings highlight missing or conflicting information which caused the validator to perform some guesswork prior to validation, or other things affecting the output below. If the guess or fallback is incorrect, it could make validation results entirely incoherent. It is *highly recommended* to check these potential issues, and, if necessary, fix them and re-validate the document.

 **Using experimental feature: HTML5 Conformance Checker.**
The validator checked your document with an experimental feature: *HTML5 Conformance Checker*. This feature has been made available for your convenience, but be aware that it may be unreliable, or not perfectly up to date with the latest development of some cutting-edge technologies. If you find any issues with this feature, please [report them](#). Thank you.
