DEPARTMENT OF ELECTRICAL ENGINEERING & COMPUTER SCIENCE

COMPUTER SCIENCE DIVISION

CGS 3175 Internet Applications Fall 2015

Assignment 1

Due, Tuesday, September 16, 2015 for 100% credit

Wednesday, September 16, 2015 for 90% credit

Thursday, September 17, 2015 for 80% credit

Friday, September 18, 2015 for 70% credit

Scenario

You have started your own business in a traditional brick-and-mortar facility and you need to develop a website. The website will be developed in stages. Each assignment represents an upgrade to your website.

Assignment 1 Create the Title Page

Create the title page of your website. Your title page should include the following:

1. `<!Doctype>` declaration using HTML5
2. `<head>` section that implements the `<title>` element and the `` element
3. `<body>` section that implements
 - a. `<article>` or `<p>` paragraph describing the Website
 - b. `<aside>` with the company's name, address, city, state, zip, phone number(s), fax number, point of contact, hours of operation
 - c. in a new `<section>` display a list (``, ``, or `<dl>`) of the services or products your company offers
4. comments as necessary; a minimum of one comment identifying the author and date
